B.S Mathematics - Economics (Joint Major) + Minor in Computer Science *CGPA/Minor GPA: 3.83/3.87*

Relevant Courses: *Real Analysis, Adv. Calculus, Applied Probability, Machine Learning, Convex Optimization, Data Mining, Deep Learning, Adv. Signal Processing, Reinforcement Learning, Adv. Econometrics, Generative AI, Numerical Analysis*

Research Experience[1]

Research Assistant Summer 2024 – Present
Dr. Hassan Mohy-ud-Din *Lahore, Pakistan*

- Main research is centered on generative models and their applications in medical imaging and inverse problems like MRI reconstruction, binary/multi-class segmentation and image restoration, resolution etc.
- First author of **Wave-GMS** (ICASSP 2026, under review): lightweight multi-resolution generative model (∼2.6M params) achieving state-of-the-art segmentation and cross-domain generalization on medical imaging datasets.
- Compiled notes on mathematical inequalities, e.g. Jensen's Inequality, and their applications in data science and information theory.

Senior Year Research Summer 2023 – Summer 2024
Dr. Muhammad Tahir *Lahore, Pakistan*

- Senior project on **Model-Based Deep Learning** for matrix completion. Proposed ConvMC-Net, a convolutional network replacing nuclear-norm updates with trainable layers, achieving faster and more accurate recovery compared to ALM and ADMM-Net.
- Extended this work with ConvHuberMC-Net, introducing a convex Huber criterion and unfolded Majorization–Minimization framework to improve robustness to impulsive GMM noise, eliminate explicit singular value thresholding, and enable parallelizable computations. See Report + Presentation.

Directed Research Project Spring 2023
Dr. Ihsan Ayub Qazi – Network Systems Group @ LUMS *Lahore, Pakistan*

- Developed a *Shiny* app to predict digital literacy using a pre-trained Random Forest model — source: GitHub.
